## Summary

Full-Stack Developer with five years of experience leading both front-end and back-end development, ensuring an effective and swift responsiveness of applications and performing quality assurance. Led teams of 5-15 people across technology, business, and design departments. I possess an excellent reputation for solving problems and improving customer satisfaction. Highly skilled in the use of sophisticated languages such as react.js, HTML, Nodejs, Typescript among many others.

## Experience

### Full Stack Engineer

#### DevSyners

Trained and supported 10 new hires remotely to conduct interviews, lead lectures, and debug code through the 2020 Advanced Immersive Program which focused on teaching software engineering and core web technologies.

- Ensured compatibility with major browsers on mobile and desktop platforms by coordinating core server product development in Spring MVC and Spring SOA service components for more than 20 client sites.
- Improved performance by resolving more than 80 critical bugs in the company's products to improve performance.
- Implemented 10+ system and application design.
- Developed code following common security practices and development design patterns.
- Analyzed 10 user requirements to derive technical software design and performance requirements.
- Designed and created courses/contents for Frontend developers as well as building and providing massive support to Frontend developers.
- Translating UI/UX designs into actual code, ensuring technical feasibility of UI/UX designs, optimizing applications for maximum speed and scalability, building reusable codes and tools
- Leading the Frontend Engineer team in developing and translating UI/UX designs into actual codes, building reusable codes using React JS, JavaScript and styled systems.
- Create Themes from scratch for easy building for mobile applications and web apps.
- Implemented basic website security with google reCAPTCHA from firebase.
- Used different Javascript libraries and frameworks for websites mobile applications and backend services: React, React-Native, NestJS, MongoDB, firebase. Next, JQuery, axios, etc.
- Built a cybersecurity website (Hackify) for penetration testing and training of individuals interested in becoming a cybersecurity specialist with nodejs and mongodb as backend and NextJS as a frontend library.
- Used git as a version control system for keeping record of previous project and current projects running.
- Used material-UI as a style library with my react and NextJS projects.
- Built a governmental website for democratic awarding of political in Nigerian (DODAN).

## Full Stack Engineer

### Harvoxx Tech Hub

Developed a brand-new administration panel for purchasing agent business, which increased the customer service by 90% and improved the efficiency of operating by over 25%.

- Increased customer satisfaction to 85% by creating databases utilizing NodeJS, Express, and MongoDB that streamlined trucking operations from creating, assigning, and tracking truckloads.
- Developed 25 original e-commerce websites and web applications, encompassing design, coding, testing, and maintenance whilst supervising a team of 15 web developers.
- Maintained 3+ system and application as Tier 2 support (break-fit and data changes).
- Integrated existing software into 13 upgraded, modified systems for higher performance.
- Developed and executed 20+ new software solutions by analyzing system system performance standards.
- Designed, developed, and modified 15+ software systems and custom components.
- Analyzed systems flow, data usage, and work processes; investigated 100% of problem areas.
- Built scalable applications with react native for both android and iOS devices.
- Setup and maintained different database: Firebase, MongoDB and PostgreSQL.
- Developed company website on MERN stack
- Due to some limitations in React-Native, developed native modules from scratch Native iOS (Swift and Objective-C) + Native Android (Java).
- Used Firebase's live database update notifications to enable real time messaging with push notifications.
- Successfully integrated payment forms for ecommerce systems.
- Built admin section to update news and event information that are displayed on both web and mobile app with live update event from firebase.
- Used Ant Design as a style library for my react and nextjs web applications for better responsiveness of the platform and also to make it cross-platform compatible.

## Education

### Rivers State University of Science and Technology

BSc, Computer science

## Skills

React.js • React Native • Ant Design • Material-UI • MongoDB • NestJS • Node.js • PostgreSQL  
• Redux.js • TypeScript
